CCD-01-10 (LDV/LDT/ICI/LIMO)

Dear Manufacturer:

SUBJECT: Inclusion of "www.fueleconomy.gov" on Fuel Economy Labels

The purpose of this letter is to request that manufacturers include the "www.fueleconomy.gov" web site address in a highly visible place on the fuel economy labels (new vehicle window stickers) for 2002 model year vehicles. As indicated in our letters, CCD-01-08, May 10, 2001 and CCD-00-08, July 7, 2000, EPA prefers that manufacturers place the web address on the border of the label in lower case similar to the enclosed example, if possible.

A recent survey conducted by EPA has indicated that several manufacturers have placed the "www.fueleconomy.gov" on the labels of 2001 model year vehicles. By this letter, EPA requests that manufacturers include the web address on fuel economy labels for all their 2002 model year vehicles. If it is not possible to make this change to "early introduction" vehicles, we request that manufacturers make the change at next available label printing for these vehicles.

The EPA and the Department of Energy (DOE) have jointly developed the above mentioned web site. Currently, the site contains 2000 and 2001 model year electronic versions of the Fuel Economy Guides. The web site also provides historical fuel economy values (mpg) of cars and trucks; information regarding impacts of fuel economy on environment and energy conservation; tips of practical fuel economy efficient driving techniques; information about fuel economy related technologies; and hyperlinks to most manufacturers' web sites.

If you have any questions about this letter please contact Dave Good at 734-214-4450 or Emily Chen at 734-214-4122.

Sincerely,

A handwritten signature in black ink, appearing to read "Gregory A. Green", is positioned above the typed name.

Gregory A. Green, Director
Certification and Compliance Division
Office of Transportation and Air Quality
